EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 12:

Line 1, "the cap cover" has been changed to "the cap member", because its antecedent basis in claim 1 is "a cap member".

Line 2, the first and second ",", are removed (two places), so the recitation will read: "wherein the cap member covers a head surface of the print head formed with the ink jet nozzles".

2. Claims 1-12 are allowed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,557,306, "Ink jet printer with a cleaning apparatus for removing hardened ink from a nozzle plate of a print head" issued to Fukushima et al., 9/96 teaches a

wiping process, during which a second drive circuit (52, fig. 1) issues a signal (electrical) just enough to let the ink ooze through each nozzle opening so as to facilitate the wiping action.

JP 404080037 A, "Driving method of ink jet recorder" issued to Kazunaga et al., 3/92 teaches an electrical signal (fig. 6a) applied to a piezoelectric element (7, fig. 1) so as to allow ink just ooze around their nozzle hole.

Both references teach ink just ooze at/around the nozzle without jetting out of the nozzle and impinging onto a print medium by applying a suitable signal, which are electric in nature. They fail to teach the ink formed in a convex shape at the nozzle tip by pressure air.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-wen Hsieh whose telephone number is 571-272-2256. The examiner can normally be reached on 7:30AM -5:00PM.
